ABOUT ME

I am a web and mobile developer based in Spain with experience mainly in React and React Native, although I have also worked with many other technologies.

I've studied computer engineering in Rey Juan Carlos college and I've always been interested in technology, I love being up to date with the newest developments in AI, blockchain, graphic engines and any news regarding tech industry.

In my free time I usually try to work on my own projects and do some training to keep learning and improving my skills, but I also like to spend time with family and friends and I love video games.

WORK EXPERIENCE

May 2018 - Present
YAPIKO SOFTWARE HOUSE S.L.

FrontEnd Developer

Web and mobile developer with React and React Native languages mainly, but also web development with Wordpress. I've used a big amount of tools and technologies such as Jira, Confluence, Bitbucket, Webstorm IDE, XCode, Android studio, Google play and App stores, Realm DB, Redux, Jest, ESLint, Firebase and Firestore. Etc.
Worked for many different clients such as:

- Restaurantes.com: Integration of their services with google maps and REST/SOAP APIs creation and maintenance (mainly with PHP language).

- Naturgy: Web app creation with React and AWS (cognito) for CRUD functionalities.

- Coast gaming: Retro game development with React Native, Redux and Realm for both Android and App stores.

- Yapiko: Internal developments such as their own webpage built with Wordpress, ESports mobile game mockup with React Native.

- La Française des Jeux (FDJ): International sports betting company. Worked in web widgets development and maintenance with React. I've worked in a big international team with different agile methodologies and roles.

January - August 2017
